

Fall 2018

CHM 139 Tutoring

The New Process:

Students do NOT need to request tutors through the Center for Student Success. One tutor is assigned to each section of CHM 139, and as a student in each section, you will work with the specific tutor(s) for your section.

For CHM 139-03 with Dr. Hutchinson-Anderson, the tutor will attend class with you once per week so she can provide support to you and the faculty member in enhancing your classroom learning. In addition, the tutor will set two weekly times when she will be offering tutoring sessions. Students in the tutor's section are free to attend any and all of these sessions. They will be offered at various times during the week to try to accommodate as many students' schedules as possible. Please see below for details.

For CHM 139-01 with Dr. Lammela and CHM 139-02 with Dr. Hutchinson-Anderson, the tutors are unfortunately not able to attend class. However, they will still be offering tutoring sessions for the students in their assigned sections of CHM 139 and everything else will be the same as with CHM 139-03. In addition, the tutoring sessions for CHM 139-02 and CHM 139-03 are interchangeable, so students from either section can attend either tutor's sessions on a weekly basis.

Additional Information:

As the semester progresses, if you are still struggling to understand the material, please let your professor know. If you are attending the class and the workshop and have participated in multiple tutoring sessions, we may be able to make an alternate tutoring arrangement for you. However, you must be doing all of these things and you must speak with your professor first. Once you fulfill that criteria, you will need to complete a tutor request form on the Center for Student Success website.
