Integrative Studies Clusters
Courses for Spring 2016

Below you will find information pertaining to the pre-packaged Integrative Studies Clusters, and the courses offered from each cluster in Spring 2016. The clusters are arranged alphabetically within their general themes. In the earlier planning stages for the integrative clusters of our Core Curriculum, a group of faculty members met to brainstorm some ideas for potential courses that might integrate knowledge relevant to broader topics. Faculty members were also asked to contribute their ideas. The clusters here are meant to stimulate the creation of ideas by faculty and students and are not intended to be definitive requirements.
Some courses may require prerequisites, and courses are subject to change. Faculty and students should check the catalog or NazNet for further information about the courses described below.
For information about the full range of clusters, and the full list of courses associated with each cluster, please visit http://www.naz.edu/core/integrative-studies.
