### Core Milestone Experience

This is an online section of the CME. You will need familiarity with Moodle and regular access to a computer with high speed internet access for the duration of the class. The course requires independent work on a weekly basis as well as one face-to-face individual meeting that will be 15 minutes long. Students should have their IS courses completed before enrolling in the class. Students should have their IS courses completed before enrolling in the class. The Core Milestone Experience is your chance to reflect on and create and original project based on what you've learned while fulfilling the requirements of the liberal arts core, with particular emphasis on your IS courses and experiential learning experience. This is NOT a class about writing a big research paper, taking tests, or figuring out what the professor "wants". Instead, you will choose a big idea and an associated "messy" or enduring question to explore through a creative project that you design and that draws on your coursework and other interests. The project you do for this course will be uploaded to your portfolio and will represent the culmination of your Uncommon Core course work. This is an on-line, distance learning course. Students are expected to participate from the first day of classes. An online course is best suited to students who are self-directed and very familiar with Moodle and other computer technology. For important information, please refer to the following: [go.naz.edu/tlt-online](http://go.naz.edu/tlt-online).
